On Monday May 25, a group of villagers from the Ilaje communities boarded a large contract construction barge operating at Chevron Nigeria Limited's Parabe Production Platform. The villagers were unarmed and the situation has remained calm since their arrival. Work has halted on the barge and production has been shut-in at the platform. Currently, Chevron Nigeria Limited's Public Affairs staff is meeting with the community leaders to discuss their concerns which are focused on employment and community development issues. We expect the situation to be resolved soon and will provide a further update at that time.

TOE,
 Guess you got
 the PR place
 again here?
 + the usual
 Thanks
